Compatibility Issues Not all air conditioning units are compatible with solar power. Retrofitting existing systems can be complex and costly. **Suitability for Different Climates.** Solar-powered AC systems perform best in sunny climates with minimal seasonal variation, such as the Southwest United States, parts of Australia, or Mediterranean regions.

What is an inverter air conditioner? An inverter air conditioner uses a variable-speed compressor to regulate the temperature continuously, resulting in more consistent cooling, higher energy efficiency, and quieter operation.
